- Iliana Navarreto: Administrative Assistant

### List of Projects

- Hospital de Chincha
- Mobile Hospitals Koica

Odelga Med offers medical engineering projects in the Peruvian market, which include the project management, delivery and installation of medical equipment by internationally leading manufacturers, coordination on site, training of doctors and nurses. These and many more services are provided to large hospitals in the cities as well as to small clinics or outpatient departments in rural areas.

Furthermore, we have extensive experience in providing mobile healthcare solutions in remote areas of Peru, where we have delivered various mobile hospital units, which have been developed by Odelga Med in close cooperation with specialized Peruvian companies. These mobile clinics can be applied in various sectors of medical health care, such as in dental units, intensive care units, for mammography screenings, and many more.
